CONFERENCE

Sponsored by: The British Computer Society and
International Business Communications Ltd.

Computing in the construction industry

Europa Hotel, London W1. June 26th - 27th, 1973

COMPUTING IN THE CONSTRUCTION INDUSTRY

BRITAIN IN BUILDING BOOM

Britain is in the middle of a building boom, according to the figures released this May by the National Federation of Building Trades Employers. 'Work', however, is not synonymous with 'profit', and many construction companies are turning to computers as a means of improving profitability and output per employee, especially at management level. The construction industry has invested millions of pounds in computer equipment, and hundreds of organisations are spending money on time-sharing schemes or using bureaux.

This conference will show how computers can bring reliability, speed and profit to any stage of construction work—from design to planning to completion.

Profitable Construction Package

26th June, 1973

CHAIRMAN

J. N. F. Turner

Managing Director,
E. Turner and Sons Limited

9.30 OPENING ADDRESS

R. E. Eyre
